

VLANs and domains

You're visiting a customer and he has a doubt regarding VLANs. He heard once that the more VLANs one creates, the more broadcast domains one has. Do you agree with this statement or not?

Selecione uma alternativa

- A** No! The correct statement would be: "The more VLANs one creates the less broadcast domains one has"
- B** No! The correct statement would be "The more VLANs one creates the less colision domains one has"
- C** Yes! VLANs segment networks in a similar way that routers do. The more VLANs one creates the more broadcast domains one has
- D** No! VLANs do not change the amount of broadcast domains in a network
