Virtual LAN

You have a junior network engineer who asks you about some advantages of using VLANs (Virtual LANs) in a network, what would you answer to your junior network engineer?

Selecione uma alternativa

A   VLANs are just a less expensive option for routers

B   VLANs are used by Hubs to segment a network, group devices logically and prioritize traffic

C   VLANs are used by Switches to segment a network and it can also group devices that are on the same physical location

D   VLANs are used by Switches to segment a network, group devices logically and prioritize traffic
