Temporada das Altcoins

Halving

O Corte de Oferta

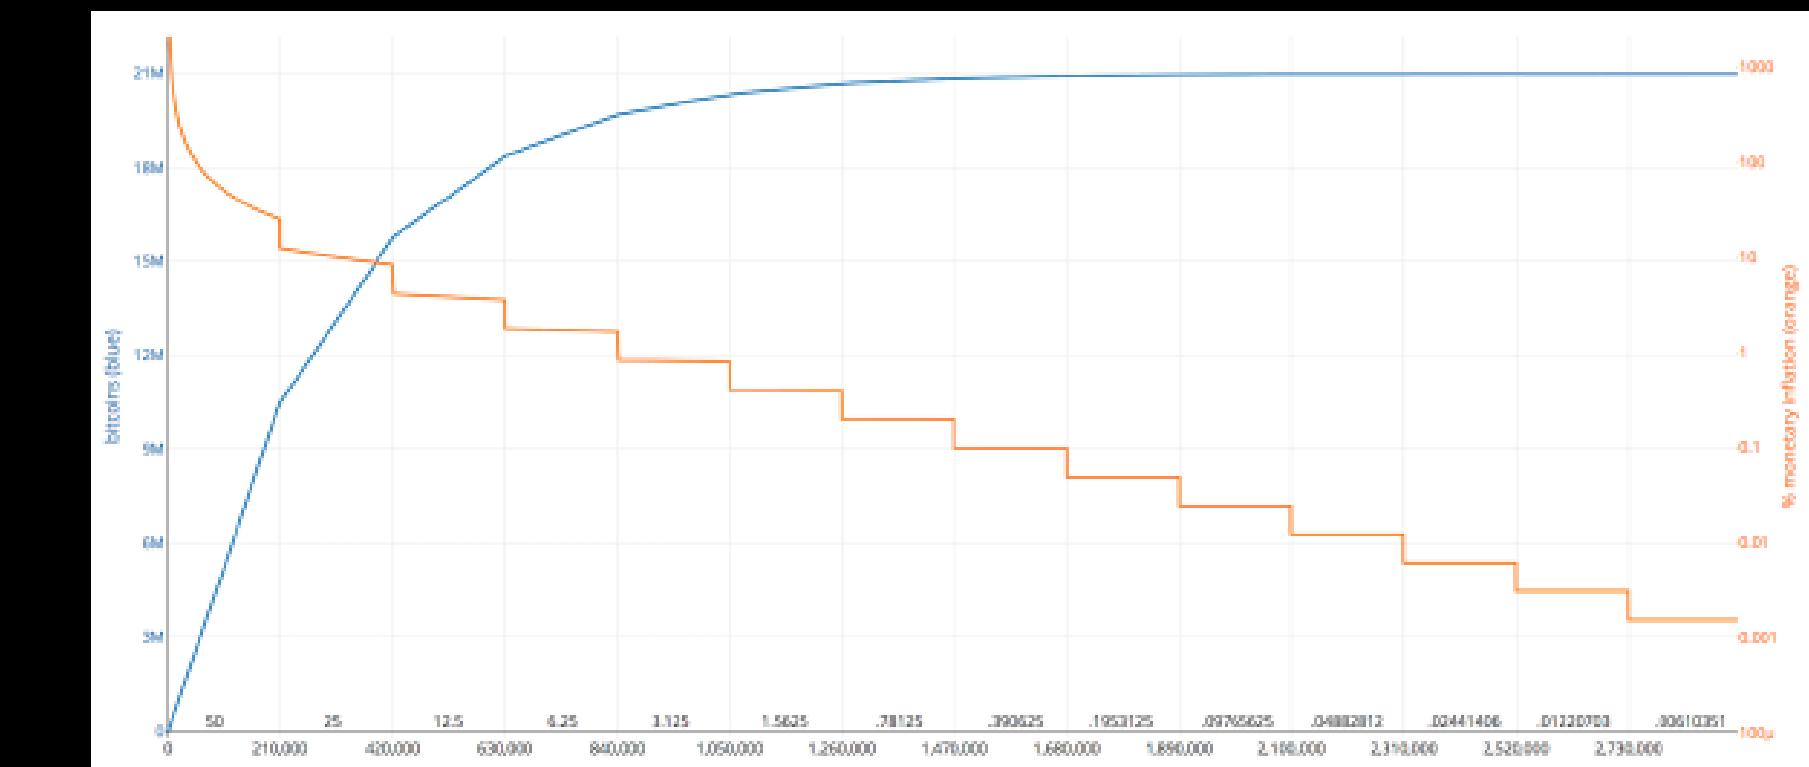

HALVING

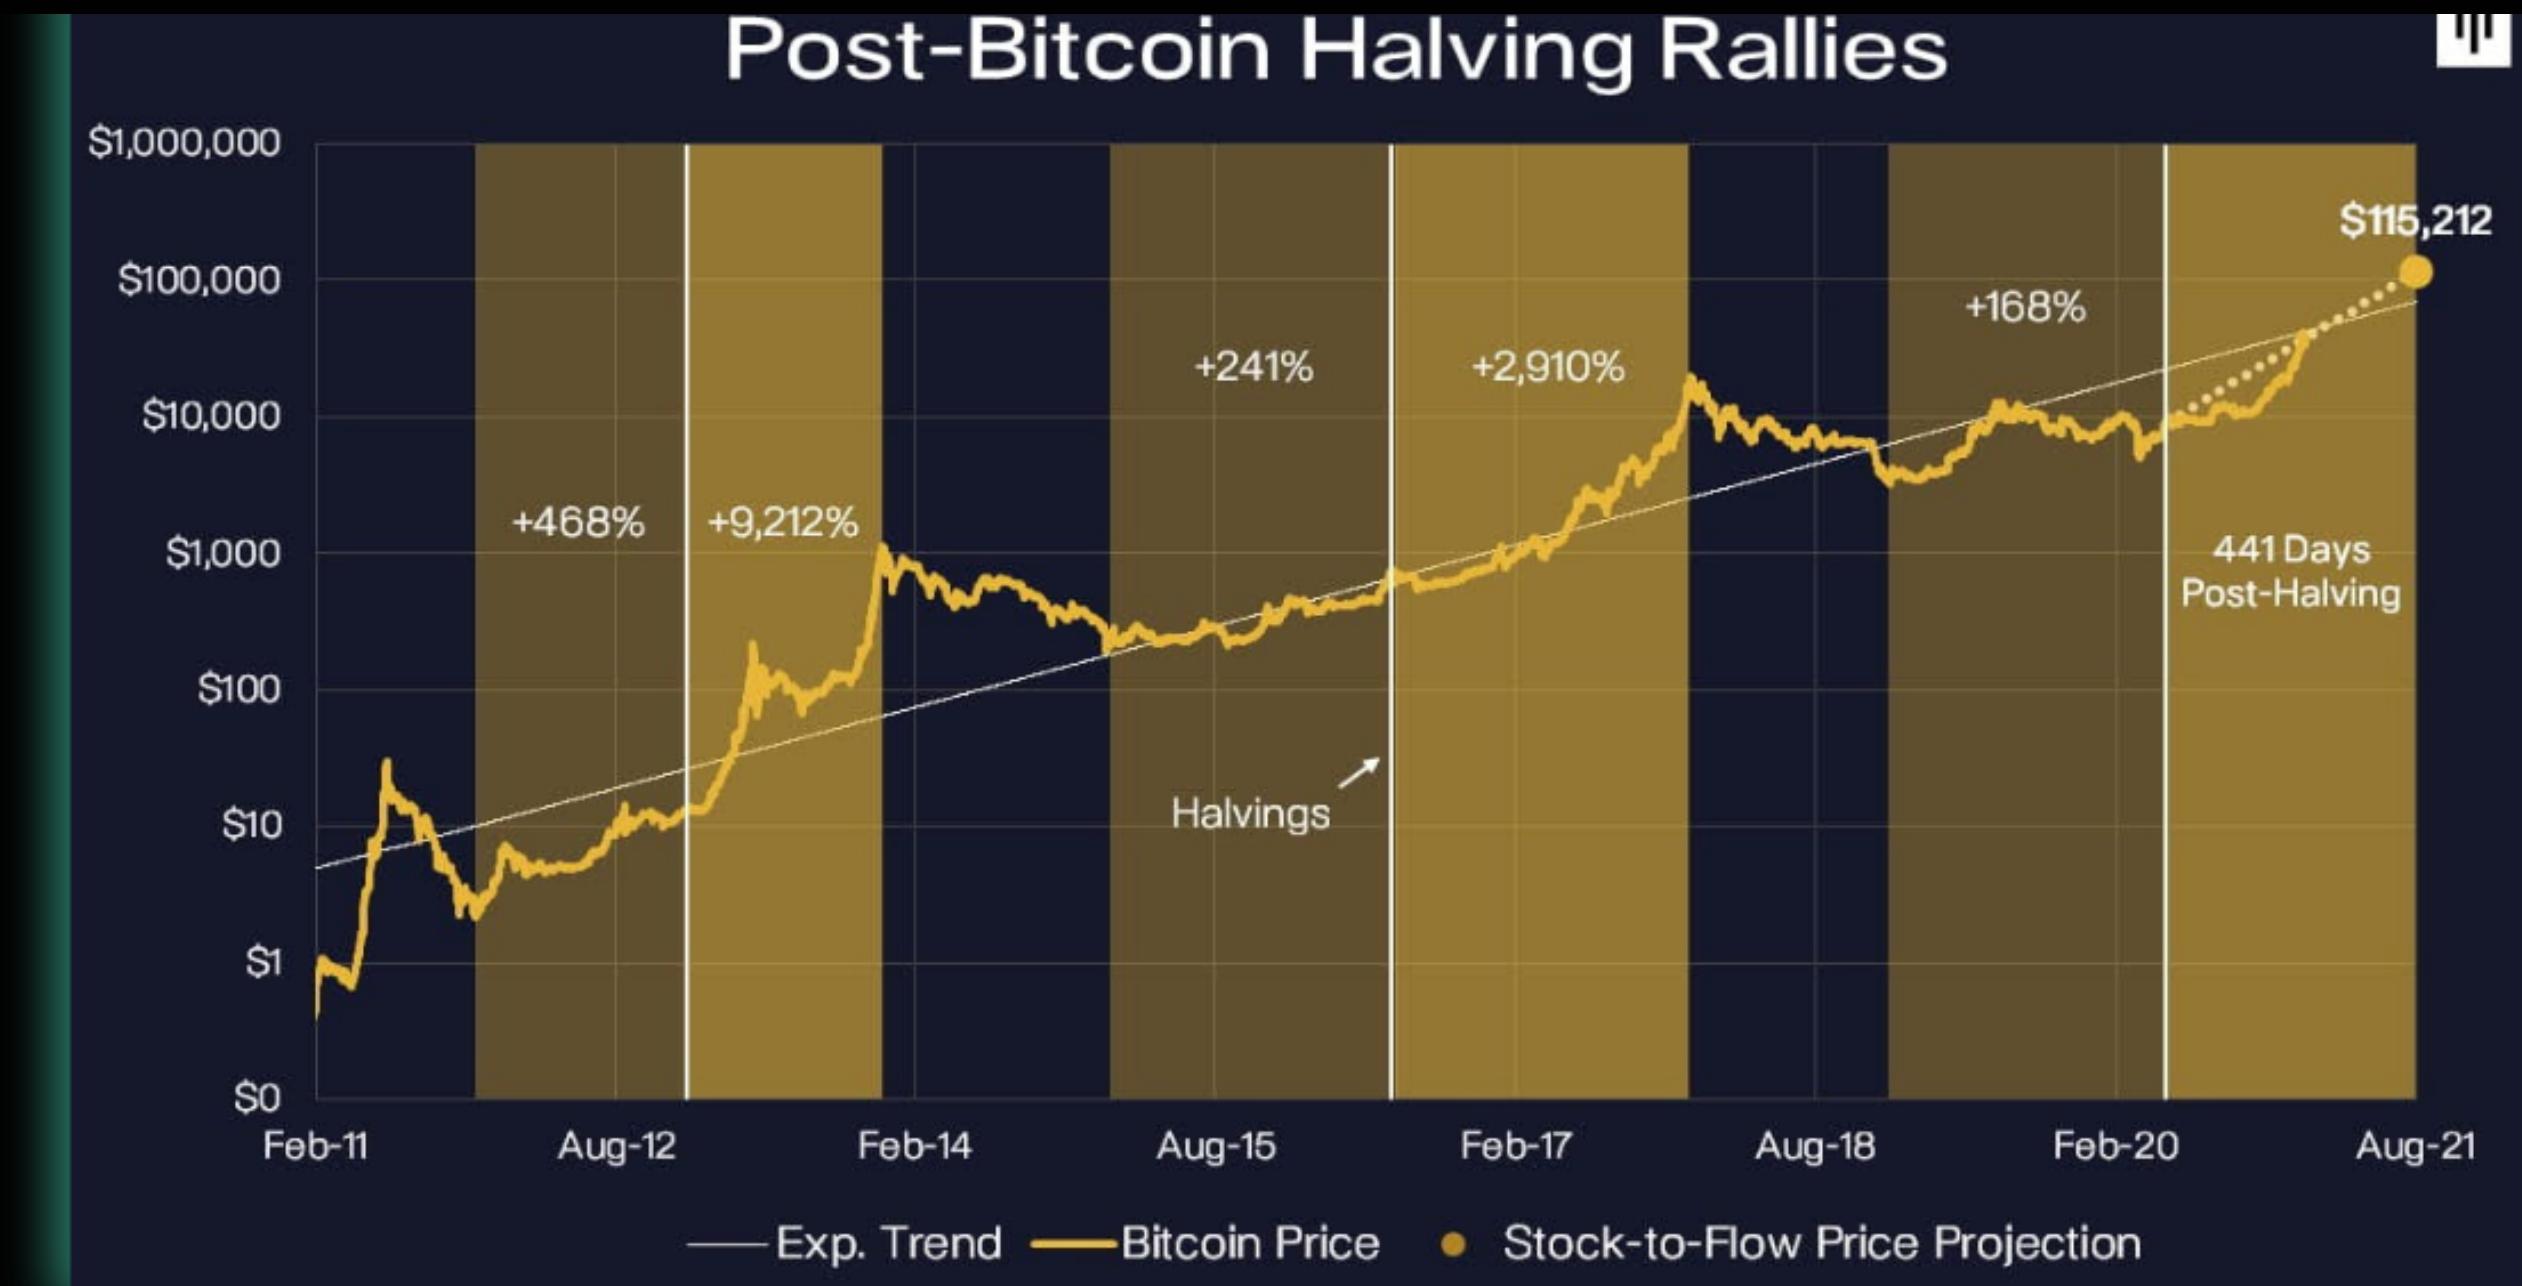

O halving é uma maneira inteligente de manter a criptomoeda escassa por mais tempo. A cada 210.000 blocos, ou aproximadamente quatro anos, o número de BTCs que podem ser minerados em um bloco cai pela metade.

Todos os 21 milhões de bitcoins serão minerados até 2140. Mas mais de 98% serão minerados até 2030.

2016 – 12,5
2020 – 6,25
2024 – 3,12

DEMO - GLASSNODE

The image shows a screenshot of the Glassnode website. At the top left is the Glassnode logo. To the right are navigation links: Studio (highlighted in blue), Dashboards, Workbench, TradingView, and a search bar. Below the navigation is a large section with the heading "Time crypto market tops and bottoms." in bold black text. A subtext below it reads: "Glassnode provides the data, knowledge, and confidence to make better investment and trading decision in Bitcoin, Ethereum and cryptocurrency markets." Two buttons are at the bottom: "Get started" (dark background) and "Contact Sales" (light background). On the right side of the screenshot, there's a preview of the Glassnode studio interface, showing metrics like "Bitcoin (BTC)" and "Bitcoin: Balance on Exchange".
