

Collapsed core

You're a network engineer and your task is to explain what a collapsed core is. How would you explain that?

Selecione uma alternativa

- A** Collapsed core is a term used when we collapse core and access layer into one single layer
- B** Collapsed core is a term used when we collapse access and distribution layer into one single layer
- C** Collapsed core is a term used when we're not following any architecture
- D** Collapsed core is a term used when we collapse core and distribution layer into one single layer
