Questão #32

PROGRESSO:

32/60

A startup needs to provide testing environments quickly. They want to have the ability to take them down easily to ensure that the cost is optimized. How should the environment be provisioned?

Selecione uma alternativa

- A** Use a custom script to create and tear down the resources
- B** Use Cloudformation templates to provision the resources accordingly.
- C** Use Autoscaling groups to provision the resources on demand.
- D** Use IAM policies to have a policy to provision the resources and tear them down accordingly.
