Questão #30

PROGRESSO:

30/60

You have a set of Lambda functions with business logic built into them. You want customers to have the ability to call these functions over HTTP. How can this be achieved?

Selecione uma alternativa

A

Use S3 websites to make calls to the Lambda

B

Use the API gateway and provide the integration with the AWS Lambda functions

C

Enable HTTP access on the AWS Lambda function

D

Add EC2 Instances with an API server installed. Integrate the server with AWS Lambda functions.
