# TUTORIAL
*Instagram Stories Spectrums*

Inside the AE Project you will find the "***INSTAGRAM**" and "**DO NOT TOUCH THIS FOLDER**" folder.

Do not touch folder named **DO NOT TOUCH THIS FOLDER :)**

Inside INSTAGRAM folder you will find 12 folders.

In each folder there is composition named:
Insta_1-12_1080_1920
Insta_1-12_1080_1350
Insta_1-12_1080_1080

And **Edit** folder:
Audio - Drag your audio file into this folder, it is needed for spectrum to react.
Center_Image - Drag face or logo image in this composition *(not all compositions have this composition)*
Image_1920 - Background image for 1080x1920 Composition
**Image_1350** - Background image for 1080x1350 Composition
Image_1080 - Background image for 1080x1080 Composition
Text_1 - Here you can change text

**Text_2** - Here you can change text

Text_3 - Here you can change text

Text_4 - Swipe Up text, you can change it here. *(Swipe Up text is for 1080x1920 only)*

NOTE - All 3 composition sizes use same text, then you change text, it will be same in all 3 compositions.

Backgrounds (Image_1080, 1350, 1920) are separated, so you need to add all 3 images to them if you need to render all 3 compositions in same time.

Drag your Audio file into **Audio** composition and close it

Drag your image or video into **Image_**Number **or Center_Image** composition, adjust it size.

In **Text_***Number* compositions change your text

NOTE - if you want to add video file - drag same video to **Audio** composition file (for spectrum) and drag it into **Image** composition (unless you want different audio than in video)

Inside Insta_1_1080_1920, etc… you will see how final composition looks like.

In Settings Layer

You can change settings of that composition:

Change color of text

Change text of Swipe Up arrow

Change Spectrum or it shadow color

Turn Off Swipe Up for 1080x1920 compositions

Turn ON_OFF Tint of background and change it colors

Turn ON_OFF Background gradiant and change it color

Change color of other elements

Not all Compositions have same Settings

Play with Setting to find your favourite combinations

NOTE - You can change to different font if you want to.

If you have some questions or suggestions, how to improve this template - write me via my envato account. Good luck and have fun with this template.
If you like it - rate it, thanks :)
