

Questão #56

PROGRESSO:

56/60

Your company decided to adopt a hybrid cloud environment. To use the cloud environment, you will need to move a large data warehouse to AWS. The total to be moved is 50 TB and will take more than a month to migrate, given the current available bandwidth. What is the best option available to carry out this migration considering the cost and performance aspects?

Selecione uma alternativa

A AWS Snowball Edge

B AWS Direct Connect

C AWS VPN

D AWS SnowMobile
