

IP and MAC addresses

Considering the topology below. There's a PC on the left-hand side trying to communicate with the server on the right-hand side, if we check with a protocol analyzer the communication between the PC and Router, what is the correct source / destination Mac Address and the correct source / destination IP address?

SA = Source address

DA = Destination address

Selecione 2 alternativas

A

IP

SA = 192.168.15.2
DA = 192.168.17.2

B

IP

SA = 192.168.15.2
DA = 192.168.15.1

C

MAC

SA = 00-01-43-75-61-13
DA = 00-02-16-43-47-01

D

MAC

SA = 00-01-43-75-61-13
DA = 00-07-EC-09-37-AD
