

Migrando para o SDK

Veja o script abaixo:

```
<Project>
  <Import Project="..\shared\Comum.csproj" />
</Project>
```

Que mudanças são necessárias para que passemos a utilizar o SDK da Microsoft? Marque a única alternativa correta com o novo script do MsBuild.

Selecione uma alternativa

A

```
<Project Sdk="Microsoft.NET.Sdk">
  <PropertyGroup>
    <TargetFramework>dotnetcoreapp2.1</TargetFramework>
  </PropertyGroup>
</Project>
```

B

```
<Project>
  <PropertyGroup>
    <TargetFramework>dotnetcoreapp2.1</TargetFramework>
  </PropertyGroup>
</Project>
```

C

```
<Project Sdk="Microsoft.NET.Sdk">
  <ItemGroup>
    <TargetFramework>dotnetcoreapp2.1</TargetFramework>
  </ItemGroup>
</Project>
```
