Types of storage

Your application has a large international audience and runs stateless virtual machines within a managed instance group across multiple locations. One feature of the application lets users upload files and share them with other users. Files must be available for 30 days; after that, they are removed from the system entirely. Which storage solution should you choose?

Selecione uma alternativa

A

A Cloud Datastore database.

B

A Regional Cloud Storage bucket.

C

A multi-regional Cloud Storage bucket.
