

SQL sem limitação!

Qual o SELECT que Beto deve usar para superar as limitações do [exercício anterior](#) (<https://cursos.alura.com.br/course/entity-framework-core-banco-legado-parte2/task/31540>)?

Selecione uma alternativa

A

```
select character_id
from lotr_characters
where character_name like '%Baggins%'
```

B

```
select *
from lotr_characters
where character_name like '%Baggins%'
```

C

```
select character_id, character_name, count(*) as total
from lotr_characters
where character_name like '%Baggins%'
group by character_id, character_name
```
