

Default region for gcloud commands

Your project has all its Compute Engine resources in the europe-west1 region. You want to set europe-west1 as the default region for gcloud commands. What should you do?

Selecione uma alternativa

- A** Use "gcloud config set compute/zone europe-west1" to set the default region for future gcloud commands.
- B** Use "gcloud config set compute/region europe-west1" to set the default region for future gcloud commands.
- C** Use Cloud Shell instead of the command line interface of your device. Launch Cloud Shell after you navigate to a resource in the europe-west1 region. The europe-west1 region will automatically become the default region.
