

Private IP address and public IP address

You need to know both the private IP address and public IP address of your EC2 instance. You should:

Selecione uma alternativa

- A** Retrieve the instance Metadata from <http://169.254.169.254/latest/meta-data/>
- B** Use the following command: AWS EC2 DisplayIP.
- C** Run IPCONFIG (Windows) or IFCONFIG (Linux).
