

Pasta para repositório local

Dado a seguinte tarefa no `build.xml` :

```
<target name="publicar">
  <ivy:publish pubrevision="1.0" status="release" overwrite="true" resolver="ivyrepolocal">
    <artifacts pattern="${build.dir}/[artifact].[ext]"/>
  </ivy:publish>
</target>
```

O `ivysettings.xml` :

```
<ivysettings>
  <settings defaultResolver="ivyrepolocal" />
  <resolvers>
    <filesystem name="ivyrepolocal">
      <artifact pattern="/home/admin/repo/[module]/[artifact]-[revision].[ext]" />
      <ivy pattern="/home/admin/repo/[module]/ivy-[revision].xml" />
    </filesystem>
  </resolvers>
</ivysettings>
```

Em que pasta será publicado o modulo `security` ?
