Questão #25

PROGRESSO:

25/60

After provisioning some EC2 instances and placing them on a public subnet. The person responsible for the task will configure the security groups. What is true for security groups?

Selecione uma alternativa

- A** You can't specify separate rules for inbound and outbound traffic.
- B** By default, a security group includes an inbound rule that allows all inbound traffic.
- C** You can specify allow rules but not deny rules.
- D** You can specify deny rules, but not allow rules.
